No flower will lend more color and beauty to the perennial garden than a mass planting of Hardy Phlox. They thrive under average conditions; bloom freely over a long period of time and are equally satisfactory when used in beds or borders.

We are growers of Phlox and have an unusually fine assortment of field grown plants. These are one-year plants, the best size for transplanting. All are well rooted and have bloomed in our fields, so we know they are all true-to-name. Phlox will start blooming early in July and continue through August into September.
